CERTIFIED BANKER

Common Qualification Benchmark

What is Certified Banker

The Certified Banker (CB) is a professional qualification developed and offered by The Hong Kong Institute of Bankers (HKIB) to help banking and financial practitioners at all levels raise their professional standards with skills relevant for the fast-changing banking environment. It also provides a common qualification benchmark that is recognised by regulators and leading authorised institutions. This new programme is an enhancement and replacement for the Associate of The Hong Kong Institute of Bankers (AHKIB™) qualification, which was launched over two decades ago.

ECF Subjects Integrated

The programme of CB encompasses both generic and specialist topics. It also integrates the programmes developed by the Hong Kong Monetary Authority's Enhanced Competency Framework (ECF). The ECF programmes, which are the building blocks of CB are administered by the HKIB.

Qualifications Framework (QF)

The CB qualification contains three progressive QF Levels (i.e. Advanced Diploma, Professional Diploma and Postgraduate Diploma). Candidates with less experience can start their training journey by studying the Advanced Diploma Programme for Certified Banker (QF Level 4). The three qualification levels have been accredited by the Hong Kong Council for Accreditation of Academic and Vocational Qualifications (HKCAAVQ) and are recognised under the Hong Kong Qualifications Framework (HKQF). Postgraduate Diploma for Certified Banker is the first and only Specification of Competency Standards (SCS)-based banking qualification which is accredited at QF Level 6 in Hong Kong. This is at the same level as a Master's degree.

**CERTIFIED
BANKER**

Qualifications and Designations

Certified Banker is a three-level qualification. Individual Members who successfully complete a particular level with relevant years of working experience in the banking and financial services sector will be entitled to use the respective CB designations.
