1. Introduction

A. *Benchmark for Professional*

The Certified Banker (CB) is a professional qualification developed and offered by The Hong Kong Institute of Bankers (HKIB) to help banking practitioners at all levels raise their professional standards with skills relevant for the fast-changing banking environment. It also provides a common qualification benchmark that is recognised by regulators and leading authorised institutions. It is an enhancement and replacement for the Associate of The Hong Kong Institute of Bankers (AHKIB) qualification, which was launched over two decades ago.

B. *Overview of the Hong Kong Institute of Bankers*

Since 2012, all HKIB's Professional Qualification Programmes (PQPs) have been accredited through Learning Programme Accreditation (LPA) exercises conducted by the statutory accrediting body, the Hong Kong Council for Accreditation of Academic and Vocational Qualifications (HKCAAVQ) which are pitched at QF Levels 4 to 6 under the Hong Kong Qualifications Framework (HKQF). In 2020, the HKIB stepped forward being appointed as a Professional Qualifications Assessment Agency (PQAA) by the Secretary for Education (SED) for HKIB's nine Professional Qualifications which are recognised under the Hong Kong Qualifications Framework (HKQF) and registered in the Qualifications Register (QR). The appointment of PQAA by SED demonstrates HKIB's capability of delivering outstanding standard of professional qualification assessment in the Banking industry in Hong Kong.

C. *Qualifications Framework (QF)*

In order to ensure sustainable manpower development amidst the rapidly changing world, the Education Bureau (EDB) of the Government of the Hong Kong Special Administrative Region (HKSAR) officially launched the Qualifications Framework (QF) in Hong Kong on 5 May 2008.

The QF in Hong Kong (HKQF) is a seven-level hierarchy covering qualifications in the academic, vocational and professional as well as continuing education sectors to promote and support lifelong learning with a view to continuously enhancing the quality, professionalism and competitiveness of our workforce in an increasingly globalised and knowledge-based economy. Qualifications recognised under the QF are quality assured and level-rated in accordance with objective and well-defined standards.

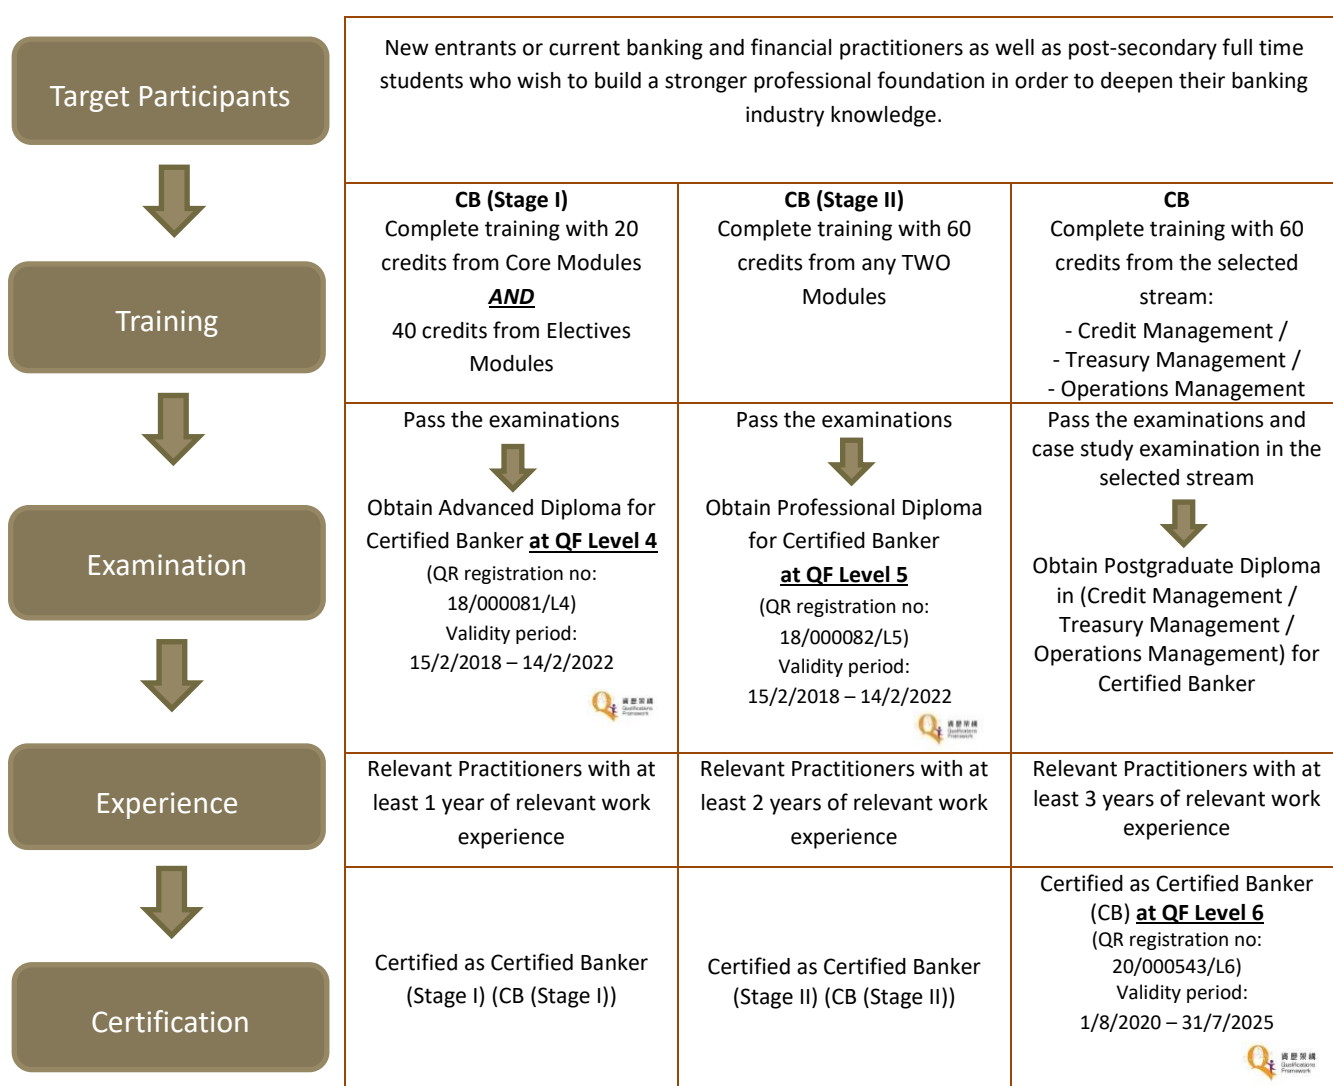

Certified Banker contains three programmes in progressive levels. Learners should attempt the programme progressively according to their academic background and related work experience. All three programmes have been quality assured by the Hong Kong Council for Accreditation of Academic and Vocational Qualification (HKCAAVQ) and are recognized under the Qualifications Framework (QF). Their learning contents are encompassing all relevant Units of Competency (UoCs) drawn from the SCS of banking industry.

4. Programme Overview - Professional Diploma for Certified Banker

A. Programme Objectives

In response to the talent development needs of the industry, HKIB provides the Professional for Certified Banker programme. The modules aim to prepare the learners to fulfil the professional competence required under the banking industry standard, the ECF.

There are two main objectives of the Professional Diploma programme:

Generalist Knowledge

The programme is developed with the objective of providing participants with generalist knowledge across different major areas of banking in order to be capable of discerning the intricacies between different operations. This is important for developing a comprehensive evaluation of impacts and risks on its own management regime and paves the way for taking up managerial positions in banks.

Evaluative Skills

Besides generalist knowledge, management of a bank also requires cognitive skills to evaluate and integrate information in a banking context. Hence, one can apply the learned skills on other disciplines in banking to his/her own regime and pave the way for the “Professional Diploma for Certified Banker” which participants will be developed into a specialist in a particular discipline of banking. As a result, HKIB launched the Professional Diploma for Certified Banker to offer a learning opportunity for banking practitioners to become a generalist.

B. Programme Intended Learning Outcomes

Upon completion of the Programme, learners should be able to:

-  Evaluate and integrate key theories / knowledge in a major discipline of banking in order to design strategies for achieving the business goals and objectives;
-  Analyse information provided by the bank’s customers, different banking units or other sources in order to assess and identify critical issues for successful implementation of the strategies (e.g. inherent risks, changes in the banking environment, the needs of different stakeholders, etc.); and
-  Manage execution and exceptional issues during the implementation of the bank’s strategies by developing a solution / management plan after appraising the situations, potential risks, the changing banking environment, etc

4.1 Business and People Management

A. Module Objectives

This module contributes to the achievement of the Programme Intended Learning Outcomes by offering the learners a unique position and perspective to examine important issues in a business and in an organisation. This module encompasses business planning, strategic corporate management issues as well as the people element in a business and organization. The various approach to analyze issues linked with people and business management by use of technological aids would enable the learners to meet other programme outcomes

B. Module Intended Learning Outcomes

Upon completion of this module, learners should be able to:

-  compare and contrast the different components of the business planning process;
-  evaluate how the process is critically applied in formulating business plans and corporate strategies;
