

B.E.S.T. Certificate Programme

Bridging the Talent Gaps for Future Banking Talent

“Capacity Building for Future Banking 2021-2025” jointly published by the Hong Kong Monetary Authority (HKMA), the Hong Kong Association of Banks (HKAB) and The Hong Kong Institute of Bankers (HKIB) highlighted four potential talent gaps required to support the sector’s planned growth:

- Banking Knowledge in the Greater Bay Area (GBA)
- Environmental, Social and Governance (ESG)
- Soft Skills
- Technology & Data

How B.E.S.T. Certificate Programme helps you build foundational Skills in each of these FOUR areas to future-proof your career

GREATER BAY AREA

The GBA presents financial opportunities, access to a much larger customer base and scalability for banks in Hong Kong to expand their business. Banks staff are expected to have a good understanding of the GBA in terms of its customer needs, legal and policy requirements, and market operations, such that staff mobility around the GBA becomes another HR deployment strategy.

ESG

ESG product innovation, policy, risk management and reporting represent a nascent skillset for bankers globally. After the HKMA’s launch of “Green and Sustainable Banking” measures in May 2019, banks have identified the need to meet the “Greenness Baseline” assessment and other tangible deliverables that will promote the climate-related risk management and sustainable development of the Hong Kong Banking industry in the coming years.

SOFT SKILLS

Our annual Talent Development Survey has identified a strong demand for professionals with specific soft skills. As banks continue to navigate through their digital transformation, they are on the lookout for professionals who pursue personal excellence and can lead and add value with their soft skills, with customer service fast becoming an increasingly important differentiator of competitiveness.

TECHNOLOGY & DATA

To facilitate digital banking initiatives, banks are redefining job roles, requiring tech-savvy professionals. It is important to have staff members who have a basic understanding of the major technologies underpinning the digital banking solutions and operational processes that are required by the industry. As data plays an increasingly bigger part in the transformation of digital banking, more banking practitioners will need data skills to help banks generate insights, make decisions, solve problems and deliver a better customer experience.

PROGRAMME STRUCTURE

The certificate programme comprises of four modules:

Module	Course code	Topic	Date & Time	Application Deadline	Early Bird Deadline
1. Banking Knowledge in the GBA	HDCPDBESP220101	Taking Credit Risk to the Next Level in HK & the GBA (with case study)	15 Feb (Tue), 7-10pm	8 Feb	1 Feb
