

Module 2

Accelerating Greentech Solutions in Asia Pacific

Programme Code: HRBT00P24082

29 August 2024 (Thursday)

7:00pm – 10:00pm

HKIB ECF SFC
CPD CPD CPT

Programme Outline

In our rapidly evolving world, greentech is vital for accelerating sustainable practices. From renewable energy to waste management and electric transportation, green technologies offer a pathway to a prosperous and equitable future. Embracing greentech is a necessity in the Asia-Pacific region, with compelling business cases and long-term profitability. However, more investment and supportive policies are needed for widespread adoption and systemic change. This session sheds light on the various aspects of greentech, highlighting its importance in achieving a sustainable future in the APAC region and beyond.

Speaker Introduction

The speaker holds a PhD in Renewable Energy Management and master's degrees in international management and accounting and finance from the University of St. Gallen and the London School of Economics. He serves as Adjunct Assistant Professor for Climate Solutions at HKUST and is a lecturer in other sustainability executive education programmes and MBA modules focusing on climate change related topics. Outside of academia, he helps to lead the Climate & Sustainability team at Deloitte Hong Kong where he leads various projects in the field of sustainability and climate change for a wide range of industries – topics include sustainable finance, climate risks, consumer preferences, developing new low-carbon business models as well as decarbonisation strategies and pathways.
