Strategic Management and Leadership (SML) Series: AI Demystified: A Practical Framework for Real Cases and Decisions

Programme Code: THGSS00P26061

22 June 2026 (Monday)

7:00pm – 8:30pm

**1.5
HOURS**

HKIB SFC PWMA
CPD CPT OPT

Programme Outline

Uses a clear AI framework (Input–Model–Output) to understand and assess AI initiatives, focusing on leadership and decision-making rather than technical detail, combined with a real-life Trade Finance OCR case showing why AI projects may fail to deliver expected value—even when the technology works.

Three key leadership takeaways:

1. Definition of success: must be clearly defined and aligned across stakeholders
2. Risk trade-offs: AI performance requires explicit choices between different types of risk
3. In-house vs third-party: should always be explicitly considered as part of the solution design

Speaker Introduction

- The speaker is a former Chief Operating Officer (COO) for Asia at a leading international bank and previously served as an Alternate Chief Executive under the Hong Kong Banking Ordinance and as a Responsible Officer under the Securities and Futures Ordinance.
- With over 30 years of banking experience, he began his career in the Netherlands and has been based in Asia since 2002, holding senior leadership roles across both front office and operations, including Head of Markets, Asia.
- He has led major transformation programmes, including large-scale system implementations and operational efficiency initiatives, and more recently focuses on data analytics and AI-driven transformation.
- He holds a Master of Science in Econometrics and Operations Research, is a Certified European Financial Analyst (CEFA), and a Certified AI Transformation Leader (CAITL)

Target Audiences
