Programme Outline

Safeguarding a cryptographic private key is fundamentally different from traditional centralised securities. As tokenisation scales, banks must understand the SFC's latest mandates for Virtual Asset (VA) dealing and custody to capture wealth management opportunities safely.

1. The Regulatory Frontier: Deep dive into the late-Dec 2025 SFC Consultation Conclusion on VA dealing, custody expectations, and capital requirements.
2. Operational Risk Shift: Architecting institutional-grade custody (Cold vs. Hot wallets, Multi-Party Computation, and disaster recovery for private keys).
3. Smart Contract Governance: Identifying code vulnerabilities (e.g., reentrancy attacks), mandatory pre-deployment audits, and post-deployment on-chain monitoring.
4. Secondary Market AML: Controlling P2P transfers using permissioned smart contracts (e.g., ERC-3643) and integrating Travel Rule protocols for atomic settlement.
